

**LOADMASTER 600R** is a robust, safe, fast, and reliable flatbed crane vehicle designed for the rapid movement of materials and services in demanding underground applications.

The robust and reliable four-wheel drive, articulated Loadmaster 600R consists of a power-shift transmission powered by a choice of diesel engines connected to heavy-duty Dana axles. The rugged frame and articulated carrier make the Loadmaster 600R a very durable and extremely maneuverable unit even in the tightest situations. Incorporating a reliable and simple mining grade crane, the Loadmaster 600R provides high speed and mobility for the timely delivery and handling of bulk materials in underground mining and tunneling operations.
